

Infiniti Achieves AWS Education Competency Status

Sacramento, CA -- June 14, 2017

Today, Sacramento based cloud services and IT consulting company Infiniti, has achieved [Amazon Web Services \(AWS\) Education Competency](#) status.

AWS Education Competency is a new AWS Competency and Infiniti is one of only a small number of global companies to achieve it.

Achieving [AWS Education Competency](#) status differentiates Infiniti as an AWS Partner Network (APN) member that has delivered proven customer success providing specialized solutions aligning with AWS architectural best practices to support the academic experience of teachers and learners and/or improve the operational needs of administrators. To receive the designation, APN Partners must possess deep expertise on AWS and undergo an assessment of the security, performance, and reliability of their solutions.

Infiniti's President, Scott Drossos, commented on attaining AWS Education Competency status, "Infiniti is delighted to be one of the first to achieve AWS Education Competency status. Our talented staff of cloud experts thrive on serving educators, students, and administrators and we're committed to improving education by leveraging AWS in innovative ways."

Drossos added, "Infiniti is pleased to be bringing its cloud expertise to more than 4 million California students and we look forward to assisting even more education institutions in California and across the U.S. in the months and years ahead. Serving education is a top priority for Infiniti and that will continue in the years to come."

Infiniti's team has a long and deep history of working on all facets of North American education; from Infrastructure, Platform and Software as services (IaaS, PaaS, SaaS) to education policy development and system-wide digital conversion strategies.

With the AWS Education Competency, organizations can find quality APN Partners, validated by AWS for education, that have the knowledge and experience to help them build a solution and leverage AWS to meet their requirements.

ABOUT INFINITI
